PROJECTS

- **A complete Ecommerce MERN website**
[mytshirtstore.netlify.app]
This is a website based on MERN stack where Database is stored at **Mongo Atlas** backend is stored at **Heroku** while frontend on **netlify**.
linked repo Frontend repo
Backend repo Nodejs,Mongodb,react
- **A Course website using GATSBYJS**
[storex.netlify.app]
here **GRAPHQL** is used as database **Contentful** as a Backend and **Gatsbyjs** as a frontend which solely is deployed on **Netlify**.
repo link Gatsby repo
Contentful , GatsbyJS
- **Magic notes using Pure JS**
[shivamkcodes.github.io/MagicNotes]
It is a website,where you can place all of your important notes and can delete them easily or save them for future reference too. I Have used **LocalStorage** to save thee data and **Bootstrap** for frontend.
repo link MagicNotes repo
Javascript,Bootstrap
- **A Postman Clone website**
[shivamkcodes.github.io/Postman]
This is just a clone of **Postman**,which is used to fetch api.using get and post request from the server.
